Commander
US Army Corps of Engineers
Louisville District
Attn: ORHOP-R/Glen Bayes
P.O. Box 59
Louisville, KY 40201

Dear Mr. Bayes:

Enclosed for your information are the 1986-1988 results of gypsy moth trapping on 12 Army Corps of Engineer sites within the Louisville District. Reported are the total number of male gypsy moths found and the trap numbers of those traps that caught at least one moth for 1986, 1987, and 1988 at each site. We are happy to report that no male gypsy moths were caught this year within the Louisville District. A few notes concerning individual sites follows:

Salamonie Lake

Although 8 moths were caught last year, no moths were caught this year.

Brookville Lake

Dropped from trapping program.

Patoka Lake

Traps were not deployed.

These trap results indicate that other gypsy moth life stages (egg masses and/or larvae) are not present. However, continued trapping is necessary to indicate when other quantitative survey methods should be employed to determine population densities. If any other gypsy moth life stages are observed, or if you have any questions about these results or other insect or disease related problems, please contact this office.

Thank you for your continued participation in our gypsy moth monitoring program.

Sincerely,
William R. MacFarlane
